

Site Planning & Installation

ICS provides our customers with all the planning, equipment, and installation services necessary for a modern MRI Imaging facility.

A great MRI facility is built with proven expertise and practical application. Our experience delivering reliable shielding solutions, expert equipment installations, and excellent customer service gives you the assurance and confidence that your MRI facility will be properly constructed and protected from EMI/RFI interference sources.

Site planning, deinstallation, shipping, and reinstallation are all integral parts of a pre-owned MRI purchase. Our trained engineers have performed numerous installations both in the United States and internationally. When you buy from ICS we build the custom MRI Shielding in our Dallas manufacturing facility, ship it to your site, and perform the shield installation professionally and efficiently. Our sales representative will guide you every step of the way to make certain that you select the proper machine for your needs, and then the project is turned over to our professional installation team, who will make sure that the equipment is installed in a timely efficient manner. These capabilities put us on the leading edge of our market, providing service superior to what the competition can offer.

ICS personnel provide a true turn-key MRI installation—start to finish. All installations are performed according to OEM specifications, ensuring that your imaging equipment will perform up to the same standards as when it was first manufactured.

RF Shielding

We are confident that we provide the best RF shielding product and service you can find. That's why our RF Shielding comes with a warranty, and we stand behind it.

Radio Frequency shielding (RF shielding) eliminates the impact of radio frequency interference. This barrier provides an environment where MRI equipment can be operated safely and effectively.

At ICS we know that the proper RF shielding is an integral part of the success of your business. We manufacture custom RF Shielding in our Dallas facility, deliver to your site, and install it as part of our MRI installation package. Since every office is a little different, our experienced team will design your barrier to perform effectively in your space. We have the necessary tools and expertise to install a long-lasting shield for your MRI facility.

RF shielding is just one of the services ICS provides. We have been in the imaging equipment business since 1998. Our employees and management have well over 20 years experience selling, servicing, and installing MRI and CT equipment. Our technical background is our strength. We aren't just salesman trying to make a quota! We are professionals with engineering experience and knowledge that enables us to provide consulting and support to our customers.

Sales & Equipment

- **MRI And CT Systems**
- **DICOM Converters and Accessories**
- **Full refurbishing**
- **Replacement Parts**

ICS has consistently provided top quality imaging equipment for over 10 years. From pre-owned MRI and CT systems to new DICOM accessories and CT Tubes, our products and services are always the best.

ICS has many systems available for sale; General Electric, Siemens, Philips, Hitachi, Picker, and more. Just contact us for a quote. Whatever system you are looking for, chances are we either have it in stock, or will have one available soon.

ICS also sells DICOM Converters for PACS and Laser Printers. The new Medical DVD Recorder accepts nearly any imaging input and records high quality DICOM images on DVDs.

We offer a wide choice of pre-owned equipment for you to select from. We also refurbish systems at our staging facility. Each system is assessed for wear and tear, and worn mechanical components are replaced. Replacement parts are always OEM supplied or approved.

Many of these systems are also available in a mobile configuration. Just ask one of our representatives for a quote. Call today **(877) 674-3833**. Or email one of our sales representatives at sales@icsmedical.net.
